Mr. Golden presents a good question. I granted confidential treatment for the documents in question because they contain commercially sensitive information related to telecommunications service agreements that deserve protection.

I will be on vacation through next week and will return on June 7 to answer any further questions.

Hello,

I understand the significance of confidentiality regarding the submitted documents (Exhibits). However, is this request, open for both parties to either object or agree? Furthermore, is it possible to further clarify the question posed.
